

WATERLESS CONCRETE CLEANER CLEANING INSTRUCTIONS

DRY APPLICATION

EFFECTIVE ON

- Concrete
- Forecourts
- Parking lots
- Sidewalks
- Driveways
- Pavers
- Drive Thrus

FREQUENCY

Apply 1-2 times per week.

TASK DURATION

1-2 minutes per task when used weekly.

TIP

Use an application schedule for best results.

RESULTS

Stains are reduced within 2-3 weeks and fully treated and removed in 4-6 weeks.

PREPARATION

1. First remove any trash or debris from application area.

TO MIX

2. Using provided scoop, apply EXIMO® directly onto oil stain. 1/4 cup will cover up to 55 sq. ft., the average size of one fuel lane or parking space.

TO APPLY

3. Keeping broom in contact with surface, sweep EXIMO both forward and backwards across the oil stain. Next, sweep across the initial line until EXIMO is fully dispersed.

4. Oil stains are removed in 4-6 weeks. Reapply weekly to avoid future stains.

Note: Applying the correct amount of EXIMO should leave no excess - if product remains, continue sweeping until EXIMO is fully dispersed.

Note: EXIMO breaks down hydrocarbon chains within the petroleum stains on the surface, and deep inside the pores of the concrete, restoring the surface to its original appearance.
