## GUM REMOVER

### FREQUENTLY ASKED QUESTIONS

**What does RADO remove?**

RADO is designed to effectively remove gum and wax.

**On what surfaces should RADO be used?**

RADO can be used on smooth and textured surfaces; from textured concrete to carpet, metal to tile and brick.

**How does RADO work?**

RADO quickly freezes gum and wax to allow easy removal with the RADO heavy-duty gum scraper.

**How long do I need to spray a piece of gum to freeze it?**

In most cases, RADO will freeze the gum in 2-5 seconds. Hot weather or abnormally large pieces of gum may require longer to completely freeze.

**Once I have frozen the gum, how do I get it off the surface?**

Once the gum is frozen, immediately scrape or chip off brittle gum with RADO heavy-duty gum scraper.

**Which situations would I use the straw?**

On all surfaces, using the provided straw allows pinpoint application on gum spots, reducing over spraying.

**How many pieces of gum does one can cover?**

One can of RADO could last for up to 110 pieces of gum.

**What are the safety procedures for using this product?**

Please read product label for proper cleaning instructions and safety information prior to product use. RADO is flammable and should be used only as instructed.

**Is RADO VOC compliant for use in California?**

Yes. RADO meets strict VOC compliance standards and is compliant for use in California.

**How long should I wait to chip off the gum once it is frozen?**

Immediately chip or scrape off brittle gum with RADO heavy duty gum scraper.
