

LIQUID DE-ICER AND PRETREAT

SAFE PATH is an environmentally safe liquid de-icer and pretreat solution that is effective in extreme winter conditions. It is a quicker alternative to traditional, chloride-based de-icers like rock salts. Compared to rock salts, SAFE PATH is better for floors, concrete, and metals at no additional cost. It is also a chloride-free formula that is safe for many surfaces, equipment, human, animals, and landscaping. SAFE PATH is best used as a pretreat before snow and ice accumulate but can also be applied as a de-icer. SAFE PATH is a clear liquid that tracks like water but won't stain entryway carpets and floors like rock salts.

BEFORE

AFTER

ADVANTAGES

- Effective at temperatures down to -26° F and continues to melt ice as low as -72° F.
- Non tracking solution: Won't track residue into your facility compared to rock salts.
- SAFE PATH can save you on costs and labor with its easy application using a 2-gallon sprayer.
- Environmentally friendly formula means safe to use around plant and animal life.
- SAFE PATH works fast so sidewalks and walkways are safer quicker.
- Stays on longer, requiring fewer applications, meaning less product is wasted.
- Easy to handle, stable in storage, and no agitation required.
- SAFE PATH is chloride free & non-corrosive.

EFFECTIVE ON

- Fueling Stations
- Parking Lots
- Sidewalks
- Drive Thru Lanes
- Forecourts
- Driveways
- Concrete
- Asphalt
- Pavers
- Sump Covers

PRODUCT INFO

- Weight: 22 lbs
- Coverage: 4,000 sq ft
- Item Number: SAF2
- UPC Number: 850022489044

NOTE: A number of conditions can affect the performance of SAFE PATH including the type of surface area, temperature, and snow or ice build-up.
